

**SAFETY
FIRST**

Keep Your Kids Safe

**TEACH THEM
TO FLY RIGHT**

FLYING TOYS AND POWER LINES DON'T MIX

Kites, drones and other flying toys are made for wide-open spaces ... far away from electric lines. Kids need to know the danger of coming into contact with power lines. Teach them to stay safe.

**SAFETY
FIRST**

SHOW YOUR KIDS SAFE AREAS TO FLY

Never allow children to fly toys in areas where power lines are nearby. Help children understand safe play by showing them where it is and isn't safe to fly. Then watch to make sure they follow the rules.
